

HOS Report 7/20/23

VOA submission calendar

All of last year's submissions are completed. This year's calendar is in the folder.

Read Well By Third Grade

The required plan is in the consent agenda folder. It is also on the website as required. The data uploads to MDE are also completed. They were all due by July 1. The plan itself will undergo quite a few changes this year I would assume as we learn more about the Read Act, finalize structural changes to the MTSS plans and committees, etc.

Legislative updates

In the consent folder, is a 104 slide presentation from MDE outlining all of the changes made in the last legislative session. Is an extraordinary amount to process, and of course instead of just issuing schools money for things like MTSS and cybersecurity, they decided to make those into grants we will have to apply for.

Covid "Safe Learning" Plan review

We are obligated to review this plan periodically as a requirement of receiving ESSER money. Most information is yet to be updated for this year, and frankly much appears to be simply removed or allowed to expire so many links appear outdated. I have yet to find any documentation that states we do not have to continue the reviewing of this doc. Therefore, it is included in the consent agenda folder.

Food Service

Sherry has confirmed that both our sponsor and site applications have been submitted via CliCS and are showing as approved.

BerganKDV

BerganKDV has merged with and will now be known as Creative Planning Business Services. We will have the same services, contract, etc as we have just signed a 3 year agreement with them. Just a new name and parent company.

Building

We are moving forward with some kitchen repairs, plumbing upgrades to the washer connections, plumbing adjustments in the kitchen, and changing the tables in Erdkinder science requiring some electrical work and plumbing as well. The garage work is almost set to begin. Just awaiting the final contract. Floor cleaning is ahead of schedule, and some rooms are being painted as needed.

Summer school

We are in the middle of the summer 23' summer school funded by ESSER monies. This will be the last year of this recovery program as the funding for summer school specifically is exhausted. We have about 45 attendees for the 3 week session.
