## Bluffview Summer Planning Survey - Families

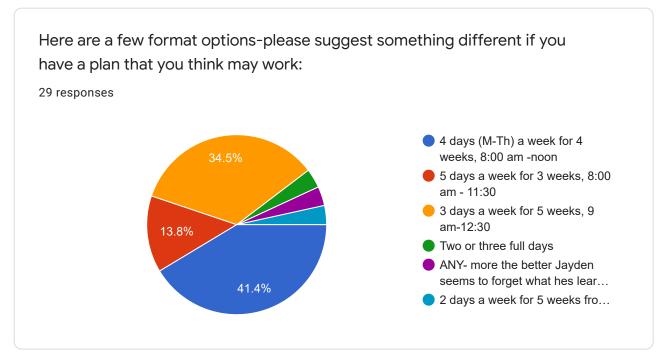

44 responses

**Publish analytics** 

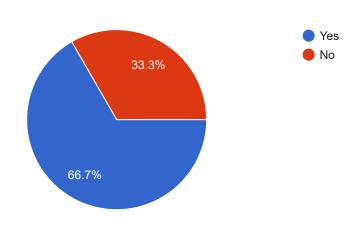

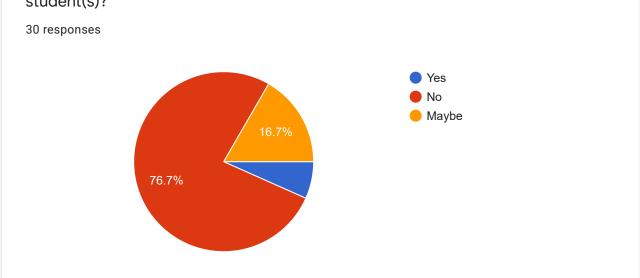

Would you be interested in attending a Virtual Meeting (ZOOM) to discuss / review our school wide student screening data from this year so far? (This will be the first tool used to identify students in need for summer programming)

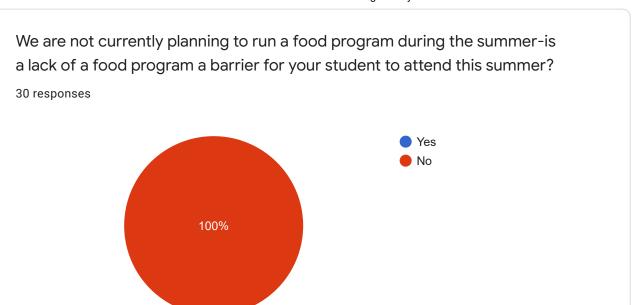

Would a lack of school based transportation be a barrier for your student(s)?

Questions or comments on the idea of summer programming?

9 responses

I'm not sure if scheduled summer school is needed for my kids but suggestions/worksheets that can be done at home would be helpful. We worked on workbooks last summer for math, etc

I think this is a great idea. Based on what my kids last report card said, I don't think there is a need right now, unless conferences reveal any other need.

I'm super interested

XXXXX needs ALOT of repetition in order to learn.. If we can space his out the better so he is constantly reminded of the wonderful things he is learning. :)

I don't believe 3-4 weeks would be enough for him. Is there an option where he is there every week throughout the summer? Maybe 1-2 times a week? Just so he can stay in a pattern? According to his IEP he is needing speech 3 times a week and like every other parent I do not want my child to fall behind.
