Introduction

The Minnesota Association of Charter Schools Compensation Survey was initiated in 2006 in response to requests from member schools for comparative data about salaries and benefits offered in charter schools across the state.

The Compensation Survey Report is used by charter school boards, finance committees, school directors, personnel committees and business managers in their financial planning and budgeting decision-making processes. The Survey also serves as a way for the Association to assess trends regarding compensation in Minnesota’s chartered public school sector.

The 2020-2021 survey results are reported according to school enrollment size.

There are **four school enrollment size categories**: *under 100 students, 101-250 students, 251-500 students, and 501 or more students.*

School Size Categories			
	Actual	Survey	Percentage
0 – 100	31	16	52%
101 – 250	57	33	58%
251 – 500	39	21	54%
501+	40	20	50%

It is important to note that while school enrollment size seems to be a significant determinant in salaries and benefits, it is not the only factor. *Even among schools of similar enrollment size, student characteristics that drive categorical aid (e.g. compensatory) lead to variability in total revenue.*

It is also important to mention that the compensation package of any charter school will not look exactly like another that of another school given their unique mission, philosophies, and values – which is the entire point of chartering. Additionally, each charter school develops unique job descriptions to meet the needs of their organization. As a result, titles/positions do not always directly correlate across schools.

Because of these facts, the Compensation Survey Report provides ranges and averages to guide local discussions and decisions. We hope you find the data both useful and thought-provoking,

Please feel free to contact us with any questions or suggestions for the next compensation surveys which is scheduled to be conducted in the fall of 2022.
