

## Erdkinder Fair and Share set for February 14th

Erdkinder students have been working individually in Science on developing testable questions, researching topics, outlining procedure, collecting data, analyzing results and making conclusions. Investigation topics vary, including food questions: How do

ingredient varieties affect final product? What popcorn pops the best? Animals: How often to bunnies binky? Does music affect a dog's behavior? Sports: Which drink really gives the most electrolytes? Physical and chemical science: Which plane style flies the farthest? What liquids affect sea shells the most? How strong is that toilet paper? What's the best hide tanning method? Wrestling with winter sidewalk blues? Check out the study on what melts ice the best. Plus biology, psychology and more.

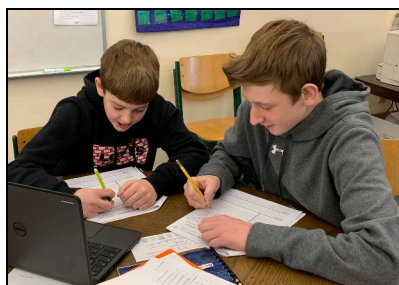

In Social World, in conjunction with National History Day MN's "Breaking Barriers in History" theme, students have been researching issues where barriers existed and analyzing the conditions and advancements related to breaking those barriers. Topics include Eli Whitney and the cotton gin, Jackie Robinson, female war spies, Ruby Bridges, breaking the sound barrier and

more. Students spent a research day in early January at St. Mary's University in the Fitzgerald Library. Thanks to Dr.

Lippman and all the staff that assisted with this comprehensive learning endeavor!

We will be celebrating our work on Friday afternoon, February 14th and invite all Bluffview families and friends to attend any time between 1:00 and 2:00. Students will be on hand to summarize experiments and research and answer questions about their projects. Please join us in our hallway area for an afternoon of enjoyable conversation with our Erdkinder class.
