

## Erdkinder History Day and Science Fair a Success

A huge thanks to all who joined us at the Bluffview Fair and Share on February 14th. Students enjoyed sharing their history research and science experiment findings and appreciated the attention given to their thoughts and ideas.

Congratulations to our Erdkinder students on jobs well done. The variety and quality of work was impressive.

For the Science Fair projects, Erica Ruppert (*How do common household liquids affect seashells?*), Aza Theresa Williams-Carpenter (*Toilet Paper Strength*), Oscar Heckman (*Pucker Up: Sour Candy pH*) and Chase Van Fossen (*Liquid Type and Plant Growth*) will all go on to participate in the Southeast Minnesota & Western Wisconsin Regional Science and Engineering Fair held at St. Mary's University this Friday, February 21.

Several Erdkinder students will also participate in the upcoming Regional National History Day event held at Winona State University on March 17. We wish our students well at the next level! Watch for updates on those event experiences.
