Free Community Flu Vaccination Clinics

October 1 – 31, 2020

For details, locations and times, visit:

winonahealth.org/flu2020

Every year, and even more so in the midst of the global COVID-19 pandemic, health officials advise that everyone age 6 months and older be vaccinated against the flu.

As Winona Health plans for the fall season and the potential surge in respiratory illnesses, whether influenza, COVID-19, strep throat, or other respiratory-related infectious conditions, the Winona Health Board has determined that **for the month of October 2020, Winona Health will provide free flu vaccinations to our community** funded by the Winona Health Foundation.

Those under 18 must be accompanied by a parent or legal guardian. Please dress in clothing that will let you quickly expose your upper arm.
